DETAILED ACTION

Allowable Subject Matter

Claims 1-37 are allowed.

The following is an examiner's statement of reasons for allowance:

With respect to independent claim 1, at least the protocol engine included in each node from said first subset of nodes being configured to limit to a predefined period of time, any sharing of a memory line of information stored in the remote memory system that is local to a home node from the plurality of nodes and the protocol engine included in the home node being configured to identify only nodes other than nodes in the first subset that are sharing the memory line of information is not taught or suggested by the cited prior art of record. Claims 2-22 depend upon claim 1 and are allowable for at least the reasons set forth with respect to same.

With respect to independent claim 23, at least the protocol engine included in the home node configured to generate a reply in response to the request to share the memory line of information such that the requesting node receives a copy of the memory line of information and updates a count indicating the unidentified node is sharing the memory line of information (stored in the remote memory subsystem that is local to the home node), said count subsequently indicating that an unidentified node from said first subset of nodes is sharing the memory line of information is not taught or suggested by the cited prior art of record. Claims 24-28 depend upon claim 23 and are allowable for at least the reasons set forth with respect to same.

With respect to independent claim 29, at least the protocol engine included in the home node further configured to generate a response to the request to share the memory line of information such that the requesting node receives a copy of the memory line of information, wherein the home node is configured to retain sharer information identifying only nodes other than nodes in the first subset that are sharing the line of information is not taught or suggested by the cited prior art of record. Claims 30-34 depend upon claim 29 and are allowable for at least the reasons set forth with respect to same.

With respect to independent claim 35, at least the protocol engine in each node in said first subset of nodes configured to treat requests initiated by said one or more I/O devices for a shared copy of a memory line of information maintained in a memory subsystem that is local to another node as a request for an exclusive copy of the memory line of information is not taught or suggested by the cited prior art of record. Claims 36 and 37 depend upon claim 35 and are allowable for at least the reasons set forth with respect to same.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
